

# Research Misconduct: A Global Concern

\*Debra Schaller-Demers<sup>1</sup>

## 1. Memorial Sloan Kettering and SRAI

Research integrity and compliance issues are rarely a simple matter of right vs. wrong. Often there are subtleties of dubious practices that can mar a scientific project, a career, and an institution. Factor in global collaborators with different policies, guidelines, expectations, and/or accepted practices, and the situation becomes even more complicated and difficult to mitigate.

Recent NIH policies in the US regarding foreign influence and its impact on multi-national collaborations, will also be discussed.

Keywords: Research Integrity, Research Misconduct, Research Compliance
